

Environmental Policy of Micronova Industries

At Micronova Industries, we are committed to conducting our business operations in a manner that prioritizes environmental sustainability and minimizes the impact of our activities on the planet. We recognize the importance of protecting the environment for current and future generations, and we are dedicated to continuous improvement in our environmental performance. This policy outlines our commitments and principles:

- 1. Compliance:** We will comply with all applicable environmental laws, regulations, and standards related to our manufacturing of brass and other metal components, as well as extrusion rod production. We will strive to go beyond mere compliance and set higher internal standards for environmental protection.
- 2. Pollution Prevention:** We are committed to preventing pollution at its source by implementing efficient production processes, waste reduction measures, and the responsible use of resources. We will minimize the release of hazardous substances, emissions, and waste into the environment.
- 3. Resource Efficiency:** We will optimize the use of natural resources, such as water, energy, and raw materials, throughout our operations. This includes adopting innovative technologies and practices that promote energy efficiency, reduce water consumption, and minimize material waste.
- 4. Sustainable Products:** We will actively work towards designing, producing, and delivering products that have a reduced environmental impact throughout their lifecycle. This includes considering factors like material sourcing, product durability, recyclability, and end-of-life management.
- 5. Recycling and Waste Management:** We will establish effective recycling and waste management systems within our facilities. This involves segregating waste streams, promoting recycling initiatives, and ensuring proper disposal of hazardous materials according to regulations.
- 6. Continuous Improvement:** We are committed to setting environmental performance targets and regularly reviewing our progress. We will actively seek opportunities to improve our processes, reduce our environmental footprint, and enhance our overall sustainability.
- 7. Employee Engagement:** Our employees play a vital role in achieving our environmental objectives. We will provide training, awareness programs, and opportunities for employees to contribute to environmental initiatives and suggest improvements.
- 8. Stakeholder Collaboration:** We recognize the importance of engaging with stakeholders, including customers, suppliers, regulatory authorities, and local communities. We will actively communicate our environmental efforts and encourage feedback to enhance our practices.
- 9. Emergency Preparedness:** We will establish comprehensive emergency response plans to address potential environmental incidents and minimize their impacts on the environment and local communities.
- 10. Transparency and Reporting:** We will maintain transparency by regularly reporting our environmental performance and progress towards our goals. This will foster accountability and demonstrate our commitment to responsible environmental practices.

This Environmental Policy reflects our dedication to environmental stewardship and sustainability. Through the collective efforts of our employees and stakeholders, Micronova Industries aims to lead by example in promoting a greener, more sustainable future.
